# Recycling Stations are the “NEW NORM”

## SET UP YOUR OWN RECYCLING STATION

According to [Construction Specifications Canada](#), construction and demo waste makeup 23 percent of society's overall waste and is the greatest producer of wood waste in North America. Builders may assume that environmentally friendly practices will hurt their bottom line, but waste diversion can reduce disposal costs by up to 30 percent.

Here are the tools and education to set up a successful recycling station including proper signage, a recycling station overview and a few tips towards your landfill diversion journey.

# GARBAGE

WAIT!

BEFORE IT GOES IN THE BIN:

- IS IT ORGANIC?
- CAN YOU REPURPOSE IT?
- CAN YOU DONATE IT?
- CAN YOU RECYCLE IT?

At Sea to Sky Removal, we're committed to making your waste management easier and more sustainable.

Certified

This company meets the highest standards of social and environmental impact
